OUR METHOD

SEPTEMBER 10TH TO SEPTEMBER 16TH

All the ratings here are made with quantitative informations.

By this way we don't work with informations around the development of the tokens technology, or even the specialized media information about what's goin on.

On the other side, this method can bring objective analysis so, then, we can compare all the tokens under the same rule.

Also, we evaluate with numbers what the method predicts compared with what happens next.

So we can calibrate the weights and make this information week by week better and better.

We hope this report is valuable to your trade or hodl decisions!

The Cryptoong Report is made by Daniel Scandiuzzi (<https://www.linkedin.com/in/daniel-scandiuzzi-20724614/>) and Hugo Trombini (<https://www.linkedin.com/in/hugotrombinioiveira/>).

Any suggestion or complaint, or if you just want to talk with us, please contact at cryptoong@gmail.com.

This report was finished at September 10, 2018 12:02 UTC.

Disclaimer - This is a collection of public resources and opinions, it is not direct financial advice. We're not responsible for the accuracy or validity of these information. Our intention is to provide unbiased information to the crypto community. We do not want to influence the market in any way to our own or others' benefit. We do not recommend or encourage participating in any initial coin offering. We do not recommend or encourage buying or selling cryptocurrencies if you have any legal restriction to do it.
